SHARP / NEC

Something Unique

In an era where audio visual technology is critical to successful working practices, choosing the right technology partner to guide you through the challenges of hybrid working and blended learning becomes more important than ever before.

Delivering the highest quality user experiences from the widest portfolio of display products is just one element of our partnership promise. We pledge our partnership for the long-term, nurturing reciprocal relationships, and implementing our highly regarded service and support. We commit to continued innovation, resolute in our corporate responsibility and sustainability goals, and purposeful in supporting our partners through the design and deployment of outstanding projects on a local and global scale.

We stand apart by offering something unique. Find out why you should choose Sharp/NEC.

WHY YOU SHOULD CHOOSE SHARP/NEC?

Dependable Reliability

Sharp/NEC's engineering quality brings peace of mind, through the reassurance that your investment will continue to deliver peak performance over its long lifetime, and beyond. The meticulous selection of high-quality components and innovative design means that our products are engineered for 24/7 operation, robust against the most demanding usage.

Metal Chassis

Rigid and stable, yet light in weight, aluminium provides the strength behind Sharp/NEC's Large Format Displays and dvLED modules. Precision engineered, dvLED modules remain perfectly aligned.

[LEARN MORE](#) about the quality, safety and peace of mind achieved by using a metal chassis design.

Thermal Protection

Extending the life of our Large Format Displays, the metal framework naturally dispels heat, whilst Sharp/NEC's unique heat management system monitors the temperature inside the device to auto-trigger fans.

Fire Safety

The fire-retardant metal chassis enables Sharp/NEC to achieve excellent results in fire safety and fire load testing meaning no additional protection compensation investments are required.

Service & Support

Sharp/NEC's class-leading global service and support infrastructure is unrivalled in the industry. We aren't just selling a product, we are offering a partnership for the long-term, by your side through the entire sales cycle from pre-sales through to the replacement phase, minimising the total cost of ownership and protecting your ROI.

Trusted Brand

Our brand boasts an industry-leading low failure rate. We are trusted by many of the world's leading organisations. Our enduring MultiSync® brand promises consistent reliability.

Global Warranties

Our warranties underpin our dedication to quality, ensuring that our products deliver optimal performance. Optional extended warranties guarantee peace of mind over an extended timeframe.

ServicePlus Program

Our customers can concentrate on their business activities, confident that their IT infrastructure is underwritten by the ServicePlus promise.

Installation & Managed Services

We take the guessing out of installing and managing a Display Solution inventory over a standard or extended lifecycle through our wide range of value-added services.

Long Life Sustainability

High quality product manufacture means extended product lifetimes, deferring replacement, and therefore waste, over a longer time frame. Durable product design also supports Reuse, Repair and Recycle initiatives, further extending the product lifecycle, whilst helping to Reduce energy consumption.

Reduce

Embedded computing devices use power more efficiently, whilst additional hardware is not required. Sensor technology assists in optimising brightness levels to minimise power usage.

Repair

dvLED is highly serviceable with components that can be repaired and replaced to support its extraordinarily long lifetime of over 10 years. We offer a comprehensive, tailored service program.

Recycle

Metal, the major component in our Displays, is infinitely recyclable for the circular economy. Our Large Format Displays are 97.4% recyclable, and our optimally sized packaging is 100% recyclable.

Reuse

Sharp/NEC's innovative open modular design allows computing power to be upgraded, signage isn't disposed of, but repurposed or reconfigured, extending the life of the display and reducing waste.

Solutions-Based Technology

Supplier of dvLED surfaces, passive and interactive MultiSync® LCD Large Format Displays and Video Walls, Laser Projection, and MultiSync® Desktop Displays; Sharp/NEC offers the widest range of globally available visual display technologies and associated hardware and software solutions. No other displays vendor is in this position, allowing us to be entirely unbiased in our recommendation.

Consultancy Partner

With Sharp/NEC you benefit from our client-centred consultancy, ensuring you achieve the perfect-fit technology solution according to your unique application requirements.

Global Standardisation

With Sharp/NEC you can deliver consistency across your global estate, including enduring support for pricing, warranties, and communication about future product releases.

Partnerships & Alliances

We work with some of the world's leading solutions providers. Combining our expertise means our customers benefit from a turnkey solution, tailored to the needs of any vertical market sector.

Vendor Compatibility

Many of our products are compatible with the latest meeting room systems including Cisco Webex, Barco ClickShare and Creston RoomView, and certified for MS Teams for the best user experiences.

User-Centred Innovation

Our innovation is not technology for technology's sake; its drilling down to the real needs of the application and identifying how we can improve the entire user experience. By listening to and understanding the users' real needs, we find ways to incorporate technology enhancements that release powerful usage enablement.

Integrated Computing

Our customisable selection of slot-in options, with memory, storage and operating system preferences seamlessly embedded into our displays, brings choice, flexibility and security.
